

# PictureSnapApp

## Sample Navigation Software

ONLY \$499

- ◆ Utilize PictureSnapApp on \*any\* instrument stage, e.g., EPMA, SEM, SIMS, LA-ICPMS, AFM, etc. . .
- ◆ Calibrate your images using two or three reference points, then drive the stage to exact sample locations by double-clicking
- ◆ Create unlimited point and FOV annotations, all automatically saved
- ◆ Embed sub images anywhere on your base image all precisely located
- ◆ Quickly and easily transfer stage calibrated images from one instrument to another. Quick re-calibration allows you to navigate your samples on other instruments.
- ◆ PictureSnapApp interfaces to FEI/JEOL/Cameca stage hardware, and utilizes an easy text input mode for other instruments
- ◆ Import images to PictureSnapApp from any source: slide scanner, flatbed scanner, optical microscope, SEM, camera, etc. . .
